

## KEYNOTES

**Clover Hogan** is a young activist and graduate of the Green School who is dedicated to combatting environmental exploitation. Through compelling communication, she is working to empower individuals and encourage significant behavioural change.

**Gede Robi Supriyanto** (Robi Navicula) is an Indonesian rock musician, activist, writer, and farmer. Robi is the director of [Akarumput.com](http://Akarumput.com), a social-environmental online magazine and media consultant, and is certified Permaculture designer who teaches organic farming in Bali and around Indonesia. Robi is the vocalist, guitarist, and the founder of the rock band Navicula, combining activism and music as tools for social change. Formed in 1996 in Bali, they have released 7 full-length studio albums and often collaborate with organization such as Greenpeace, ICW, LIPI, Walhi, and SPI. Navicula is an internationally award-winning band, they have toured Canada, the United States, and Australia. Their latest album "Love Bomb" was recorded in legendary studio, Record Plant, in Hollywood. Robi also performs with alternative-rock duo GANJIL and as an acoustic solo act.

## SPEAKER SERIES

Friday 10 June @ 11:00am-12:00pm

### **What's New? Sustainable Solutions on the Rise (Part 1)**

Hear from local Solution Providers about their new eco-innovations and programmes that are contributing to a more sustainable Indonesia.

**Sean Nino is currently** the co-founder of Mantra. Born August 1983 in Germany and raised in Bali; Nino spent most of his childhood and teenage years in Seminyak, Bali. Nino went to BIS till 1994 and then continued doing private school in Seminyak till 1998 before going to Germany, where he finished his education and completed his Masters in Sustainability Economics and Mgmt. Nino traveled many places backpacking and spent a semester abroad in Yogyakarta. He has worked for the German development association and Temesi Recycling in Bali, for UNEP and for Rip Curl Asia. In 2013 Nino and his friends Maitri and Wayan decided to start Mantra, an environmental company that focuses on easy to achieve environmental solutions within the fields of Energy, Water and Waste. The company works closely with large resorts in Bali and develops saving strategies that help save costs and benefit the environment. The group is passionate about making a difference in Bali and believes that the island needs innovators and a strong movement to push for much needed change. Mantra has started building a database of benchmarks and has taken on the challenge to develop Bali's own set of Ecosystem Boundaries. What is the limit of our island's environment? How much can it handle and how can we create tools that help make better decisions in the future?

**Rodney Westerlaken** is the founder of soul surf project Bali by Yayasan Bali Bersih, a Dutch / Indonesian foundation working on a sustainable coastal and sea environment by educating orphans, street kids and disabled kids for the past 8 years. One of the initiatives of soul surf project Bali is the Eco Surf Shop, where sustainable surf gear can be purchased. Rodney Westerlaken holds a bachelor in Education and a master in Indonesian Studies and is currently undertaking his PhD in Cultural Studies. Besides being the founder of soul surf project Bali Rodney also works as program coordinator and lecturer of cultural and social studies at Stenden University Bali.

# SUSTAINABLE SOLUTIONS

## FROM THE GROUND UP

**Jelena Vukosavljevic** is PADI IDC Staff Instructor and she is professionally working in diving business for past ten years. She can teach you all levels of PADI diving courses, from Open Water Diver to professional levels such as PADI Assistant Instructor, and all that on several languages – English, Italian, Russian and if she tries hard even German. She has over 3000 dives across the world and more than 400 student divers. Jelena has worked as a diving instructor in Egypt - Safaga, India - Andaman Islands, as a dive manager in Croatia – Hvar Island and also Cambodia. Her last known address is in Zen Dive Bali in Candidasa, Bali. She is happy to work for a company supporting her leading a Trash Hero Candidasa chapter in organizing weekly cleanups.

Saturday 11 June @ 1:00-2:00pm

## Tales of an Activist: From Challenge to Triumph

Hear from inspiring individuals who have taken on worthy environmental and social causes, from the ground up. Learn the WOW and the HOW as they share their experiences with overcoming the real challenges that many local activists face.

**Emmanuela Shinta** is an activist and filmmaker, and also the founder of Ranu Welum foundation which is committed in preserving culture, saving forest, standing for humanity in Borneo and lifting up the voice of Dayak people to the world. She and team run YOUTH ACT campaign, a movement with ultimate goal; to end the forest fire and toxic haze that happen in Kalimantan for 18 years.

**Julien Goalabr ** is the co-founder of the festival “TrashStock – Musik Artistik Plastik”, a not-for-profit event uniting art, music and entrepreneurship to tackle the plastic pollution of Bali. Julien has a background in Logistics and Environment Management Systems (EMS) and use his PR freelancing to give exposure to purpose oriented organizations. He believes that there are many stories to be told and that sharing them is a powerful way to inspire others and lead change.

**Melati + Isabel Wijsen** are the founders of Bye Bye Plastic Bags and students at Green School Bali. They are on a mission to ban plastic bags on the island and approach this through a multi layered approach with a team of dedicated youth from around the island. Last year they spoke on the TED stage, sharing their story and inspiring youth around the world to ACT. Their talk recently hit 1-million views!

**Rodney Westerlaken** is the founder of soul surf project Bali by Yayasan Bali Bersih, a Dutch / Indonesian foundation working on a sustainable coastal and sea environment by educating orphans, street kids and disabled kids for the past 8 years. One of the initiatives of soul surf project Bali is the Eco Surf Shop, where sustainable surf gear can be purchased. Rodney Westerlaken holds a bachelor in Education and a master in Indonesian Studies and is currently undertaking his PhD in Cultural Studies. Besides being the founder of soul surf project Bali Rodney also works as program coordinator and lecturer of cultural and social studies at Stenden University Bali.

**Gaia + Tori** are 2 high school students from the Green School Bio Bus Team. They are apart of the Grease Police team which collects used cooking oil from the local community and educates about the dangers of used cooking oil.

Saturday 11 June @ 2:30-3:30pm

## What's New? Sustainable Solutions on the Rise (Part 2)

Hear from 5 local Solution Providers about their new eco-innovations and programmes that are contributing to a more sustainable Indonesia.

**Piet van Zyl** is South African and the Group Director of Engineering and Environment for Alila Hotels and Resorts Asia, India and the Middle east. He graduated from an agricultural high school where he developed his environmental background and has a BSc degree in Civil Engineering and a Masters degree in construction management. He was a scuba diving instructor and had his own business and a Scuba diving school in South Africa. He used to fly his own plane as a licensed pilot. He lived and worked in Fiji for 11 years, 8 of which as a general manager for 2 island based hotels. He also worked in Belize Central America, Auckland New Zealand, and Maldives before starting with Alila Hotels and Resorts 5 years ago. Piet is based in Bali.

**Renee Martyna** is a former UN development worker turned social entrepreneur. She came to Bali 7 years ago to start a training centre for recovering aid workers and ended up co-founding Bali's first community coworking space: Hubud. When she is not thinking, writing or facilitating groups about the future of work and education, she is world schooling her two sons, because being a knowmad is her primary passion.

**Tomohiro Hamakawa** is currently the Chief Strategy Officer at Kopernik. He is a seasoned development professional having lived and worked in various corners of the world from the Tibetan plateau, Indian drylands, Indonesia's tropics, to Japanese metropolises. He has extensive field experience working for international and local development NGOs across Asia and Africa, including Kopernik, the Children's Investment Fund Foundation, Save the Children, UNICEF, and The Bridge Fund. He was formerly an Assistant Professor at the Global Leadership Program at the University of Tokyo. Tomo is also the Co-founder and Managing Director of Earth Company. Tomo has a BA in Social Anthropology from Harvard College, a Master in Public Policy from the Harvard Kennedy School, and was a fellow in the Asia Pacific Leadership Program at the East-West Center. Tomo was recognized as one of the 51 Unsung Heroes of Compassion 2014 by His Holiness the Dalai Lama.

**Thomas Flamant** has a test facility in Denpasar where he has been researching organic waste bioconversion with black soldier fly larvae (*hermetia illucens*). They are high in proteins and an ideal food source for animals such as chickens and fish.

**Kyla Langotsky** is the Social Media and Sustainable Outreach Coordinator for the Green School Bio Bus. She recently spoke on the TEDx Ubud stage about her team's efforts to fight the black market and create a greener Bali through transportation. Kyla does a lot of planning for projects and outreach on the team. She was one of the members who went to Paris for the COP21 Conference as well.

## WORKSHOPS

Saturday 11 June @ 11:00am-12:15pm

### **Build a Rainwater Capture System at Home by Maitri Fischer**

Learn about rainwater capture systems, from designs to implementation. The workshop will give you the opportunity to design a rainwater catchment system for your house that you can bring home and implement. Designs will focus on a rainwater catchment system for reuse for the garden.

**Maitri** grew up in Bali from the age of 1. He completed high school in BIS and went on to study Geosciences and Astrophysics in Germany and then completed his MSc. Degree in Environmental Hydrology in the Netherlands. Being passionate about the environment and business, Maitri came back to Bali to start Eco Mantra with Sean Nino Lotze, a consulting company in the field of energy, water and waste. The company works closely with large resorts in Bali and develops saving strategies that help save costs and benefit the environment. The group is passionate about making a difference in Bali and believes that the island needs innovators and a strong youth movement to push for much needed change.

Saturday 11 June @ 11:00am-12:15pm

### **Personal Sustainability by Aaron Eden + Zach Reznichak**

Join the discussion on what the role of the individual is in a sustainable world. Who do we need to be? What are the relationships involved?

**Aaron** plays in the space where community, technology, and trust mingle to form powerful learning experiences. He recently traveled the world with his family for seven months, during which time he accepted a position at [Green School Bali](#), where he now serves as Director of Entrepreneurial and Enterprise Programmes. His recent past involved co-founding [iLead+Design](#), a popup studio school in Monterey, California; serving as Director of Education Technology at Stevenson School, in Pebble Beach, California; and organizing [TEDx](#) events in Monterey. Aaron will be moving on from Green School in June to form a global consultancy focusing on education transformation.

**Zach** is a process orientated researcher, writer, filmmaker, music producer and mentor. He goes towards what he is drawn to learn and what he fears most. He is on a continuous search for new experiences that will empower others and for personal growth guiding individuals and groups in mindfulness, narrative, back-design and peer-to-peer curriculum development. After five years of teacher-training and corporate talent retention, in 2012 Zach took his work into Canadian public high school classrooms in the English Montreal School Board. Connecting students and teachers to authentic motivation tools, in two years, Zach helped reduce the drop-out rate from 50% to 8% at one of Montreal's toughest inner city schools.

Saturday 11 June @ 11:00am-12:15pm

## Square Meter Gardening by Maria Farrugia

Jump in and get involved with how to make the most of small garden spaces

**Maria** manages Partners and Communications for the Kul Kul Farm. If Orin (founder) is the vision and direction of the farm, Maria, you could say is the heart, creative ideas, and voice that connects the farm to the world. She is committed to adding a deeper layer to the business. A background in marketing balanced with a love for yoga, she spearheads our Kul Kul communications. She was previously marketing director of GreenCamp at Green School and has decided to immerse into farm life, and learn more about growing organic food and sustainable living. Maria was born and raised in the little island of Malta.

Saturday 11 June @ 1:00-2:00pm

## Creating Sustainable Habits by Maya Hurd-Lücker

Explore the world of habit as it relates to green living. This workshop will support you in internalising behavioural patterns that will allow you to live a more sustainable lifestyle.

**Maya** is a third culture kid who has been island hopping since day one. She was born on an island off the coast of Washington and was raised between the PNW and a boat in the Caribbean Sea. Maya moved to Bali, "island of the gods," almost five years ago and has been attending Green School ever since. She is a member of Green School's class of 2016 and will be graduating in June. Maya's interest in behavioral psychology stems from a workshop that she participated in with world-renowned social psychologist Dr. Philip Zimbardo.

Saturday 11 June @ 1:00-2:00pm

## Guilt Free Desserts by Avara Yaron

Stay guilt free in this RAW desserts workshop, while you learn to make a sesame ball, chocolate turtle and vegan whipped cream.

**Avara** is an entrepreneur and an artist with a passion for uplifting those around her and developing community. Avara has explored life as a writer, filmmaker, painter, counselor, meditation guide, designer and chef. For 20 years she has had a romance with the island of Bali, initially as the manufacturing hub for the line of fine jewelry, handbags and clothing she designed, then as the ideal climate in which to grow her vision of a healthy world through nutritious food. A lifelong foodie, Avara became a raw food chef after falling in love with the power of living foods, leading her to develop a raw food delivery and catering company in southern Oregon. Having discovered the innovative Green School, Avara moved with her daughter, Sofia, to Bali. There she dreamed up, co-founded and currently operates Living Food Lab, with a casual, raw vegan cafe on the grounds of the Green School and another in the secret garden of Hubud, Ubud's collaborative business space. Through Living Food Lab Academy, Avara travels worldwide teaching, facilitating retreats and creating pop-up dinners, sharing her enthusiasm for nutrition, her delight in inspiring and connecting with people, and her alchemical wizardry in the kitchen, turning people of all ages on to the power of their food choices. At Living Food Lab there is never a dull moment, whether the crew is catering an event, expanding their product line, or exploring new ways to tantalize tastebuds. Our modest mission: Living Food Lab... saving the world one meal at a time! Conscious food, healthy people, happy planet.

# SUSTAINABLE SOLUTIONS

FROM THE GROUND UP

Saturday 11 June @ 2:30-3:30pm

## **Solution Suds + Slick Rides by Bio Bus Team**

Used Cooking Oil is a hazard to the environment and health of the people in Bali. It is cancer causing and significantly contributes to ocean and soil acidification. We intercept the supply chain to the black market by collecting used cooking. Consequently we mitigate these effects and use this raw material to make biodiesel to run our Green School buses. We further close the loop on waste by using the byproduct glycerine to make soap. Solution Suds are sold locally and used to barter for used cooking oil. During this workshop you will make a batch of solution suds and learn more on how to start a Bio Bus Program!

Saturday 11 June @ 2:30-3:30pm

## **ACTivism by Kul Kul Connection + Green School Students**

Join students from the local Sibang Kaja community and Green School to explore the power of performance for activism. Learn from the experts who are taking Indonesia by storm through their musicals, documentaries, and performances.
